

IDOWU MICHAEL OPEYEMI

Full Stack Developer

Lagos, Nigeria | idowumichael900@gmail.com | github.com/Mikesticks4Tech | [LinkedIn](#) | fiverr.com/mikesticks4tech

Portfolio: my-portfolio-eight-dun-99.vercel.app

PROFESSIONAL SUMMARY

Self-taught Full Stack Developer with 2 years of hands-on experience building modern web applications using React, Node.js, and MongoDB. Recently expanded into real-time systems, building a live GPS-tracking platform using Socket.io and the browser Geolocation API. Passionate about clean code, fast delivery, and building products that solve real problems — from fintech and logistics to e-commerce. Comfortable working across the full stack, from responsive React frontends to RESTful APIs, WebSocket infrastructure, and database architecture. Quick learner who actively uses AI tools to enhance productivity and code quality.

TECHNICAL SKILLS

Frontend: React.js, Vite, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST API Development, Socket.io (real-time / WebSockets)

Database: MongoDB, Mongoose, Database Schema Design

Payments & Maps: Paystack (card, bank transfer, USSD), Leaflet.js, Geolocation APIs

Auth & Security: JWT, Role-Based Access Control, bcrypt

Tools: Git, GitHub, Vercel, Render, VS Code, Postman

AI-assisted development: Claude AI, GitHub Copilot

PROJECTS

DeliverTrack — Real-Time Delivery Tracking Platform | delivery-tracker-black.vercel.app

- Built a full stack last-mile delivery platform with live GPS tracking — riders share real-time location via the browser Geolocation API, broadcast through Socket.io, and rendered on a live-updating Leaflet map for customers
- Implemented JWT-based role authentication across three user types (customer, rider, admin), with Socket.io connections authenticated using the same tokens as the REST API
- Designed per-order Socket.io rooms so location broadcasts stay scoped to the correct delivery and customer
- Integrated Paystack for delivery payments with server-side transaction verification
- Built an admin analytics dashboard (Recharts) showing order volume, revenue, and 7-day order trends
- Deployed live: React/Vite frontend on Vercel, Node.js/Express backend on Render, MongoDB Atlas

Stack: React, Node.js, Express, MongoDB, Socket.io, Paystack, Leaflet.js, Tailwind CSS, JWT Auth

EscrowNG — Secure Peer-to-Peer Escrow Platform | escrowng.vercel.app

- Built a fintech platform enabling secure peer-to-peer transactions where buyers fund escrow via Paystack and funds are held until delivery is confirmed
- Implemented a dispute resolution system and a seller invite flow, with real-time transaction status tracking

Stack: React, TypeScript, Node.js, Express, MongoDB, Paystack, JWT Auth

InvoiceNG — SaaS Invoice & Payment Platform | invoice-ng-olive.vercel.app

- Built a SaaS platform for Nigerian freelancers to create invoices, send them via automated email, and collect payments through Paystack
- Implemented client management, a revenue dashboard with charts, and automatic payment verification

Stack: React, TypeScript, Node.js, Express, MongoDB, Paystack, Resend, Recharts

Chopfast — Food Delivery Web Application | chopfast.vercel.app

- Built a full stack food delivery platform for Lagos with real-time geolocation and interactive Leaflet.js maps

- Integrated Paystack payments (card, bank transfer, USSD), user authentication, cart management, and order tracking

Stack: React, TypeScript, Vite, Node.js, Express, MongoDB, JWT Auth

Gadget Store — Full Stack Ecommerce Platform | gadget-store-app-topaz.vercel.app

- Developed an ecommerce platform for electronics with product listings, live search, category filters, cart, and checkout

Stack: React, TypeScript, Vite, Node.js, Express, MongoDB

FinTrack — AI-Powered Personal Finance Tracker | fintech-frontend-khaki-two.vercel.app

- Built a finance tracking app integrating Claude AI to generate personalised financial insights
- Implemented income/expense logging, transaction categorisation, live Recharts visualisations, and Nigerian Naira support

Stack: React, Node.js, MongoDB, Recharts, Claude AI API

Other Projects

- School Portal — student management system with role-based access control
- Bank App — banking interface with transaction history and balance management
- Chat App — real-time messaging application

EXPERIENCE

Freelance Full Stack Developer — Self Employed, Remote 2024 – Present

- Design and develop full stack web applications for clients using React, Node.js, and MongoDB
- Build and maintain REST APIs, implement user authentication, and manage database architecture
- Deliver responsive, cross-browser compatible frontends with clean, component-based code
- Available on Fiverr and Contra for web development and bug-fixing services

EDUCATION & TRAINING

Tech Crush — Cohort 5

- Completed intensive software development training program covering full stack web development

freeCodeCamp

- Responsive Web Design certification
- JavaScript Algorithms and Data Structures certification
